

exeter community energy

How community energy can help your school

15.00 to 17.00 Tuesday 15th September

Meeting Room, Stephens Scown Solicitors, Curzon House, Southernhay, Exeter

Come and find out about the opportunities and benefits for schools partnering with community energy groups and the range of possibilities.

Speakers will include:

Alistair Macpherson

(Plymouth Energy Community)

Case study of 21 solar schools in Plymouth

Andrew Shadrake

(DARE)

Experiences of community energy in Devon

Gill Wyatt

(ECOE)

Solar PV 1: A community-owned solar rooftop project

There will be plenty of time to ask questions and talk about the possibilities for your school. We also plan to have representatives from the Diocese and schools who have successful partnerships.

Community owned renewables for schools is a proven way to:

- significantly reduce your energy bills
- provide a community fund that schools can access
- create a fantastic learning resource for students
- address climate change
- empower local people and communities
