RENEWABLE HEAT AND HEAT NETWORKS: Opportunities for Exeter and community energy groups

Tues July 4th 18.45 to 20.45

Stephens Scown Solicitors
Curzon House, Exeter, EX1 1RS

Larger public authority heat network projects seem to be having more success than smaller community energy projects. Our speakers will talk about their varied experiences with heat projects to help our understanding on what can work.

Kathy Smyth, a director of the Springbok Sustainable Wood Heat Co-operative will talk about challenges and successes of their wood chip fuelled district heating system on the Springbok Estate near Alfold, Surrey.

Tim Crook, from Regen SW, will give an update on government policy for renewable heat.

Howard Smith, from the Exeter City Council will provide an update about the Exeter City Heat Network project, and the role of Dextco in public sector collaboration.

Gill Wyatt, chair of ECOE will share their experiences in trying to find a site in Exeter.

Refreshments will be provided.
